Professional Summary

Computer Science graduate with experience in multimodal machine learning R&D, data representations, and model evaluation. Combines modeling, quantitative experimentation, and system implementation to investigate hypotheses.

Professional Experience

Tieta.ai · Machine Learning R&D · Remote

R&D Researcher: Jul 2026–present | ML Researcher, CNPq RHAE Fellow (part-time): Apr 2025–Jun 2026

Collaborative R&D in multimodal machine learning and representation learning for educational analysis, including model experimentation and LLM-based components.

- Collaborated on hypothesis testing, baseline implementation, and quantitative experiment analysis, using scientific literature to inform modeling decisions.
- Collaborated on implementing and evaluating multimodal deep learning models, comparing representation and modality-combination approaches.
- Contributed to developing and evaluating vector representations and information retrieval, investigating embeddings and similarity measures for text and images.
- Contributed to experiments with large language model (LLM) components for structured information extraction and semantic representation.

Independent consulting · Educational institution · Mar 2026–present

Full Stack Developer and ML Engineer · Face Clock Evoluir

v1.3.0-rc.3: supervised institutional pilot candidate deployed to a test environment.

- Compared classical, neural, and hybrid document-triage baselines: F1 0.778 and accuracy 0.875 on a held-out test of 64 documents; the small sample limits generalization.
- Recalibrated the facial threshold: unknown-person acceptance fell from 45.4% to 0.2% in a controlled test. Calibration on the institution’s population remains pending.

Research and Projects

Triple Roman Domination in Graphs · Undergraduate thesis · 2024–2025

- Identified a counterexample to a published ILP formulation; implemented a corrected model, GA, and ACO (C++, Python/Pyomo). Evaluated 362 graphs; one run per instance limits conclusions.

Brazilian Emergency Aid · In development

- Implemented chunked Pandas and PostgreSQL COPY ingestion. Profiling on subsets up to 5 million rows exposed growing memory use; the staging-based fix remains unvalidated.

Technical Skills

Cross-validation, calibration, ablation, classification metrics; C++, GA, ACO, Python/Pyomo.

Python, PyTorch, scikit-learn; multimodal deep learning, representation learning, embeddings, information retrieval, LLMs.

FastAPI, PostgreSQL/pgvector, Docker, ONNX Runtime, Git, pytest; SQL, Pandas, NumPy.

Education

B.Sc. in Computer Science · Federal University of Ceará (UFC), Quixadá, Brazil

2021–19 Aug 2026 · Thesis defended in Feb 2025.

Languages

Native Portuguese. English: good communication; fluent technical reading of papers and documentation.
